Summary

To work in a learning and challenging environment, utilizing my skills and knowledge to be the best of my abilities and contribute to the growth of the organization as well as my personal growth. Take a look at my GitHub profile for more projects.

Projects

1.E-Advertisement Management System (Final Year Project):

- It is simply a **platform to connect brands and influencer**.
- If a brand/shop wants to connect with an influencer then they can use this platform to find the right influencer according to their choice.
- It helps many small brands/shops to promote their product with right influencer.
- Technologies used: React.js, Node.js, Express.js, MongoDB (**MERN**).

2.NotesTaker (Internship Project):

- Built a Web-based NotesTaker application. Where, we can **store, add, update, edit and delete** the note.
- Got exposure to Backend technologies.
- Technologies used: React.js, Node.js, Express.js, MongoDB (**MERN**).

Experience
